

MONSANTO CHEMICAL COMPANY

From LOCATION : St. Louis - General Offices

DATE : August 3, 1962

TO : B. F. DRAKENFELD

Mr. H. S. Bergen
Dr. R. E. Kelly
Mr. J. Hoff

Mr. E. L. French

GO

Our Sales Department has checked records back to the year in which we made Aroclor sales to Drakenfeld. A breakdown of the Aroclors and year of sale is attached. You will note that Aroclor 4465 first moved in very limited quantities in 1940. Of course, we have no idea of the fraction of this material which ended up at International Bent Glass Company of St. Louis.

I am forwarding also the copies of pertinent pages from the 1946 Application Bulletin on "The Aroclors"; this issued in May, 1946. You will note the reference to avoidance of exposure to Aroclor vapors and mention of the "acne-form of skin eruption."

We have not been able to check back to establish that any other company is using Aroclor 4465 in a ceramic enamel for glass. However, attached is a breakdown of other companies who in 1961 used substantial quantities of Aroclor 4465.

Please let me know if you need additional data.
