

1 Q And in Mr. Roberts' conclusions, it is
2 apparent that when brake shoes are beveled, ground,
3 riveted, et cetera, that exposures to asbestos fibers
4 can be quite high.

5 Likewise, exposures generated during the
6 cleaning of brake shoes and drums with compressed air
7 and dry brush methods can be high for short durations
8 of time; isn't that correct, sir?

9 A That is what it says, but let's be fair now
10 and bring in his results and show what he said about
11 it.

12 Q Do you want me to read anything on the
13 page? I have the entire report here.

14 A There is other pages. Let me read to you --

15 Q Did you bring any of the reports?

16 A No, I didn't, but I think I understand what
17 it said.

18 This is a study where they did 45 brake
19 jobs a week with four bays.

20 It says the airborne asbestos sample results
21 for samples collected during the survey are within the
