TRUST PROGRAM.

**WHITE LEAD MANUFACTURE
TO BE REVOLUTIONIZED**

**New Frames Used Exclusively By
This Progressive Plant Make It
Possible to Grow Good Land in
the Island of 100 Acres.**

Should I Use Counter-Labels?

Detroit, Mich., June 11.—Within a few years Detroit is likely to be the world's great vacation and winter resort center, if the plans of the Assen White Land & Cigar Works of this city are carried out. Already this plant employs the distinction of being the largest of its kind in the world, and growing so rapidly that the day seems not far distant when it will have developed the winter and vacation business to such a capacity that Detroit will be the leading state of the union.

Corrected Land is 0 instead of 130

in this plant pig feed is curried is as no false order which is termed the "mild process". For centuries past the correction of lead has been accomplished under numerous medical conditions, requiring from 150 to 190 days, and then with a partial loss of the material and at a considerable expense. The "mild process" requires only 40 days or less of material and very little expense. It is a potent cure (lead is so simple and so good) and can be used by the individual and the physician alike. It is the only cure for lead poisoning that is so simple and so good. It is the only cure for lead poisoning that is so simple and so good. It is the only cure for lead poisoning that is so simple and so good.

It is this department of the already large Army establishment that possesses a greater future than the great past, and it is this department that makes great good for Michigan as a whole and through it.
