Interoffice
Communication

Subject: **OSHA 1910.119 (d) (3) (I) (H)**

Information concerning the technology of the process shall include the following:

Safety Systems (e.g. interlocks, detection or suppression systems)

This document was originated by TMS prior to the EPA Audit. Do you feel that it meets the requirements of the regulation? Do we need to modify this document?

Due to changes in the way we place documents in DMS, this document, a new or corrected document will be placed in DMS as follows:

Category: Process

Subcategory: Unit Information

Identifier: Safety Systems & Interlocks

Unit: Vinyl

Area: General Plant

John Olson will be the approver for all documents pertaining to the technology of the process. Categories in the DMS tree structure pertaining to the technology of the process are:

Process

Flow Diagrams

Block

Process

Specification Manual

Products

Raw Materials
