Can Carbon-Dioxide Removal Save the World?

www.newyorker.com

CO₂ could soon reach levels that, it's widely agreed, will lead to catastrophe.

Dear Scott Pruitt and Bill Wehrum,

I invite you to read this great article from the New York Times. It does a great job explaining our carbon situation. Since you two have so much power in the fate of humanity, I think it's important that you read and understand this, and act accordingly, so that future generations have some hope at survival.

Thank you,

Brian Krouzek
