Dear [REDACTED],

Thank you for your quick reply. This day and time suits us perfect. We will come back with a proposed more detailed agenda a few days prior to the meeting.

Kind regards and have a nice weekend,

Frida

Dear [REDACTED]

Thank you very much for your message.

Out of the dates suggested, the best timing for Mr Sadauskas would be 21 April at 10:00-11:00.

Would you and [REDACTED] be available for a meeting at this time?

Thank you in advance for letting me know. Should this time slot not work for you, we will surely find another one.

Kind regards,

[REDACTED]

Dear [REDACTED],

Thank you for your mail to organise a meeting with ChemSec director [REDACTED]. Would 15/21/22 or 23 of April work for Mr. Sadauskas? I would also like to join [REDACTED] at the meeting with Mr Sadauskas.

Kind regards

[REDACTED]

Dare [REDACTED],

I am contacting you from the office of Mr Kestutis Sadauskas, Director for Circular Economy & Green Growth at DG Environment, following up on the message (below) that you received from the office of our Director-General Ms Florika Fink-Hooijer.

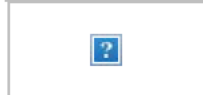

I am glad to be able to confirm that Mr Sadauskas would be happy to meet you after Easter, in April, to discuss the Chemicals Strategy for Sustainability.

Should you find this suggestion suitable, please be so kind and get back to me in order to find a suitable date and to finalise the practical arrangements.

Thank you in advance. I will be looking forward to hearing from you.

Sincerely,

[REDACTED]

Dear [REDACTED],

Thank you very much for your invitation for DG Fink-Hooijer to meet with you and your colleagues at ChemSec.

Given the numerous commitments, DG Fink-Hooijer will not be able at this moment in time.

Your invitation has been transferred internally, to the office of Director Sadauskas, to ensure the appropriate follow-up.

Best regards,

[REDACTED]

Subject: Meeting request from ChemSec

Dear Ms Fink-Hooijer,

The Chemical Strategy for Sustainability is an important step towards a toxic-free circular and sustainable future. To protect EU citizen and the environment from hazardous chemicals, the implementation of the strategy must be ambitious. At ChemSec, we are working to support an ambitious implementation of the strategy as well as a clean Circular Economy. With this in mind we would like to request an online meeting with you and your colleagues to have a dialogue about how the level of ambition of the chemical

strategy can be kept high as well as how to achieve a clean Circular Economy.

We – ChemSec – are an NGO aiming to reduce the use of hazardous chemicals by cooperating with companies and showcasing success stories and possibilities to policy makers. Read more about our work here: <https://chemsec.org/>. We are observers in several ECHA Committees and stakeholder at CARACAL and have during the last 10 years focused on an effective REACH implementation.

A few weeks ago we launched a report on the chemical aspects of circular economy, highlighting the potential financial benefits of phasing out problematic substances from recycled materials, creating non-toxic material cycles. You find the report here:

https://chemsec.org/app/uploads/2021/02/What-goes-around_210223.pdf

We have good relations with many ambitious companies willing to increase their use of recycled material, but they are struggling to find non-toxic supply. Our dialogues with them have given us very useful insights in the challenges and opportunities of a non-toxic circular economy. We are happy to tell you more about these insights in a meeting. We also hope to tell you about [our work on PFAS](#) (and companies asking for regulation of these group of chemicals), Safe and sustainable criteria and the concept of “essential use”.

We hope you would find this relevant and have time for a short on-line meeting with us at your convenience.

I am looking forward to hearing back from you.

If you have any questions regarding the topics above or other matters related to chemicals and/or circular economy, please feel free to contact us.

Kind regards,
