Macon, GA 31208

Dear Alice:

As we discussed in Detroit, I wanted to convey the two items below in writing. These relate to recent Gulf Coast Section Activities but could apply in general with AIHA LRP activities dealing with student chapters and student career information as discussed in your letter of 2/7/84 to subcommittee chairman. Indirect benefits would be realized in the Public Relations area.

Science Fairs

Most school districts, state school boards or other allied groups stage science fairs at the high school level. This year the Gulf Coast Section established an award category in safety and health for a regional fair. A savings bond was given as the award and presented the next local section meeting. Surprisingly, even without pre-notification to participants of the category, eight exhibits were found to be applicable for judging. This type of activity could be explored and mechanics for doing it conveyed to local sections.

Career Days

These are held at various levels of education from technical schools to junior colleges to four-year program schools. The Gulf Coast Section recently participated in one at the University of Houston. The national office provided some pass-out and display materials and local section members worked the booth. Based on activity at the booth, this proved successful. The same process could be developed by national as for science fairs.

Sincerely,

Thomas G. Grumbles, C.I.H.
Director, Industrial Hygiene

DATE: June 4, 1984
SUBJ: TSCA SECTION 13 COMPLIANCE

In review, the subject section requires positive verification that any imported chemical complies with all TSCA requirements. This verification must be done at the point of entry. As I understand, this is currently done for Conoco R&D with an agent in Tulsa. If not already done, we should assure that the same arrangements are made on Vista's behalf.

Steve Szabo has the details on Conoco's agreement. You may want to discuss this item with him.

Dear Joe:

As we discussed, when available would you please send me the portion of the business meeting transcript that contains Charlie Powell's comments. Also, I would like a copy of the AIHA Articles of Incorporation if available.

Congratulations on surviving your first conference. The bad news is we have one every year.

Sincerely,

Thomas G. Grumbles, C.I.H.
Director, Industrial Hygiene
