EXHIBIT**

JMMC-362

Denison Plant
June 14, 1963

C. L. Sheckler - G H Q

Your Visit June 11th & 12th

In line with your request during your visit I am attaching a copy of the analysis report by Travelers for the last carton of samples counted for the Denison Plant.

Also, a sample of the tags on the bags of fiber are attached. In discussing this with the foremen, they indicate that on several occasions men have received minor cuts about their hands and arms from the tags with the rings. It is my understanding that these tags are being used by Jeffrey.

Please check into this matter and advise.
