1105 Future Construction. No permit shall be granted for the construction or operation of any additional sewage treatment plant in DuPage County, except for interim facilities in the event of a demonstrated emergency, that does not conform with the principles of the Regional Wastewater Plan described in Rule 1102 of this Chapter, or that is of capacity so small as to produce significant diseconomies of scale or to create a significant risk of inadequate treatment, according to the policies expressed in Rule 1101 of this Chapter.

1106 Limitation on New Connections. After January 1, 1975, no source of wastes may be connected, and no existing source may be increased in the strength or volume of discharge, to any sewer in DuPage County not tributary to a sewage treatment plant that meets the requirements of this Part.

1107 Other Regulations Preserved. Nothing in this Part shall relieve any person from the obligation to comply in all respects with any existing or future regulations, including but not limited to the water quality standards and implementation plan for streams in DuPage County.
