S. B. Coolidge, Jr.

Coffeyville Plant History

Pete and Harry took a little time out the last few days to read the back files of the Coffeyville Daily Journal to try and establish the exact starting date of our first block before it is too late and the records are destroyed. This, for the reason that we thought sometime in the next few years the Company might want to take note of or celebrate the 50th anniversary of the Coffeyville Plant.

As near as we can determine, our starting date or the date on which the first production was actually turned out was April 2, 1906.

We copied some of the old articles and we are sending you and Mr. Sieplein copies of this record.
