From LAC/DC Motor Division
WIN
Date September 26, 1972
Subject Stocked Asbestos Raw Materials and OSHA Regulations

R. P. Griffenhagen

cc: D. E. Armstrong
C. J. Photiadis

The following asbestos items are stocked by LAC/DC:

PDS	Description	Number of Items (Sizes)
41311AA	Asbestos Wick (Untreated)	2
41511AA	Woven Asbestos Tape (Untreated)	2
41511BB	Asbestos Cloth (Untreated)	7
41521CB	Woven Asbestos Tapes (Treated)	20
42231AA	Asbestos Paper Tapes (Untreated)	5
42331AA	Asbestos Paper Tapes (Untreated)	1
42341BU	Treated Asbestos Paper	1
44141AA	Phenolic Asbestos Cloth Micarta	4
44341PA	Phenolic Asbestos Paper Tubing	8

Of the above items the only one that will be packaged with a caution label will be the asbestos wick 41311AA (the manufacturer of the tubing and micarta were not queried). The remaining materials are considered by their manufacturer to be coated and/or bonded, therefore requiring no label.

If our asbestos waste becomes excessive, we may have to segregate the asbestos waste and label it.

With the exception of the 44141AA and 44341PA, our normal handling of these asbestos materials should produce no airborne concentrations of asbestos fibers in excess of exposure limits prescribed (not more than 5 fibers of 5 microns or more, in 8 hours TWA).

However, the sawing or the machining of the micarta 44141AA and the tubing 44341PA should be investigated as it is felt that the minimum exposure limits may be exceeded in the particular manufacturing area.
