

In its written comment to OSHA on behalf of the asbestos industry the Asbestos Information Association/ North America stated:

" Since there is no new evidence to indicate that the 2 f/cc TWA standard adopted in 1972 does not adequately protect the health of the working population, it would be grossly inequitable and a denial of due process to lower the standard at this time."

This statement continues to reflect the studied opinion of the asbestos industry.

R. H. Mereness, Executive Director, AIA/NA
