TO Julius Nemeth - Brunswick, Ohio
DATE October 8th, 1975 SUBJECT Marble White
Please use a separate sheet for each subject treated

Dear Julius:

Replying to your letter of October 3 concerning the source of "marble white", it is true that we listed the item incorrectly. The marble white was being picked up at Georgia Marble Company, Tate, Georgia. Their address is: 3460 Cumberland ZParkway, N.W., Atlanta, Georgia 30339.

Being that we are not making deliveries in Georgia we would not now pick up this material except if some unusual situation were to arise.

Concerning the Peckham Materials Corp., material they call it "#325 Pulverized Limestone".

We used this source because there was an occasion when the White Pigments plant experienced a mud slide and some of the red clay filtered into their limestone causing the limestone to be a pinkish color. Rather than discolor our products at that time we brought in some of the Peckham material and probably will on occasion in the future when we are in their area and need a return load, if this material proves acceptable.

Any of these fillers would be used in Metro Spackle.

Thanks & regards
