

It is important to emphasize that this is a collaboration and partnering between JCML (ie the Univ of Colorado Health Sciences Center and Fudan University) and the Shanghai regulatory authorities to study and improve their ability to protect the health of workers' exposed to benzene (a national priority in China). We are full partners, bringing resources, funding and expertise...and sharing recognition (publications) with these folks. Our ties to the Shanghai medical community are strong and well publicized.

Let me know if you need anything else.

Rich

Subject: Shell Meeting with Shanghai Mayor

Rich,

I have learned that one of the CMD (Committee of Managing Directors) for Royal Dutch Shell will be meeting with the mayor of Shanghai in October. He is very aware of the study and gets our quarterly Shell updates. We have an opportunity to raise the issue of support by the Chinese agencies. I have a call with our external affairs and issue manager in China this Sunday evening. They are currently preparing the agenda and briefing for Malcolm. If we want to pursue this opportunity, I need your input on defining the issue and what the study needs. Thanks for your support.

Regards,
Patsy
