 he precipitation of copper
 mine waters.

V.S.Q.
 ry special quality
 Corporation, New York City
 1st every Wednesday evening, CBS.

Wednesday, Jimmy McDonald, ac-
 companied by four of his pals
 from the merchant marine from
 San Francisco, caught a 20 1/2 inch,
 5 pound rainbow trout near the
 diving board. The other boys in
 the group jumped into the water
 to help McDade land the fish.

The bulk price of tin cans sal-
 vaged is used for tin reclamation
 and steel production—1 per cent
 tin and 99 per cent steel scrap.

TO WHOM IT MAY CONCERN

We feel the people of this community should be informed about the situation concerning paint, enamels, etc. Some of this material, especially certain colors are not obtainable at present; white lead, linseed oil, pure turpentine are also very scarce. In view of this fact and while at present we have a fairly good supply of paints, enamels, oils, etc., don't you think it would be a good idea if you purchased these materials NOW?
