WHITTAKER, CLARK & DANIELS, INC.

(201) 561-6100

1000 COOLIDGE STREET

SOUTH PLAINFIELD, N.J. 07080

December 14, 1976

Mr. Allen McNally
Easthampton Rubber Thread Company
26 Payson Avenue
Easthampton, Massachusetts 01027

Dear Mr. McNally:

Regarding: Free Silica in Italian Talc

We have reviewed our data concerning the free silica content of various shipments of #1615 AGI Talc and #1633 Talc over the past 12 months.

Our method of analysis is based upon x-ray diffraction so that the free silica is not confused with the silica making up the magnesium silicate (talc).

The x-ray method under normal operating conditions has a limit detectability of 0.5 percent. Those reports showing "non detected" will have less than 0.5 percent.

Information determined on these talcs shows the free silica content to vary from less than 0.5 to 2 percent. Most of these samples contain less than 1 percent.

Vry truly yours,

WHITTAKER, CLARK & DANIELS, INC.

Ray R. Krammes
Manager - Technical Services

RRK/ep
