I would like to set up a meeting with you and all persons receiving copy of this letter on either Tuesday or Wednesday, Oct. 29th or 30th, preferably in the afternoon.

We have had some preliminary discussions with Mr. Mesler on this subject and have made some moves toward the improvement of conditions. We need, however, to set up a list based on practical priority and what must be done.

I would also suggest that we have Mr. Holloway from environmental control present at the meeting because of his knowledge of conditions and because the corrections are within his range of responsibility.
