SUBJECT Personnel Monitoring Schedule - DATE August 21, 1974
Baton Rouge Plant

Additional personnel monitor sampling has been scheduled for the vinyl chloride unit in the hydrocarbon plant for next week (August 26 through August 30, 1974). Joe Sanders will perform the actual sampling function with essentially the same operators that we have worked with in the past. If there is any reason that we should not go into this area, please let me know.
