VERMONT ASBESTOS MINES

CONTROLLED QUALITY FROM QUARRY TO YOU

GAF Quality Control is constant, from the quarry to the customer. Rigorous testing takes place at every step in the process. A few of these operations are shown below: (1) UOD Wet Classification Test, (2) Cone Penitrometer Test, (3) Quebec Standard Test and (4) Bauer-McNett Wet Classification Test. Asbestos from GAF is consistently of the highest quality.
