

1 airborne asbestos sample results for all facilities
2 appear to be within current OSHA asbestos standard.

3 Q Would you like to read anything else on that
4 page?

5 A No, that is the important part of that.

6 Q In fact, you said earlier that his
7 conclusions were important. And one of the
8 conclusions that he came to with the reported .21, it
9 is evident that peak exposures can be relatively high
10 during the cleaning of brakes.

11 It was also evident that the higher dust
12 exposures tend to be confined to the service bay areas
13 and especially to the mechanic performing the work.

14 Isn't that true?

15 A Yes, sir, he states it there.

16 Q Mr. Roberts went on to perform other tests
17 which, again, you place up on your board. And the
18 next one, in fact, is dated March of 1980 prepared by
19 Dennis Roberts, and this one is the reading Brake and
20 Alignment Service.

21 A In Reading, Ohio, yes.
