INTRA-COMPANY COMMUNICATION

SUBJECT Asbestos Shipments To Plant 4

DATE May 28, 1968

TO W. J. Sheehan

cc: H. G. North
L. W. Winchester
L. S. Dymitro

We have always scrapped wet asbestos whenever we have found it in our stock. We have had some problems with wet asbestos because of roof leaks around the drains and conductors. Len Winchester personally investigated the shipment in question to Plant 4 and we did not knowingly ship any wet asbestos to Plant 4. The storage area from which this particular material was taken is and was very dry.

Len Winchester has personally reviewed the remainder of the asbestos that is in storage and it is his opinion that this material is in a dry condition and satisfactory for shipment to Plant 4.
