Hourly Safety Committee Meeting
Held on November 25, 1980

— T. Ozarchuk
PMSB
SHAC

John Andrews
Jessie Butler
Bobby Dotson
Leo Garcia
Austin Gates
Vivian Hargrove
Joe Lonsford
A. E. Mofley

The Hourly Safety Committee held its regular monthly meeting on November 25.

NEW BUSINESS

● PT Engineer Procedure Knowledge and Understanding

During major shutdowns just completed in West and East plants, some PT engineers are showing a lack of knowledge and understanding of plant safety procedures. PT should undertake a training program to familiarize new personnel with requirements for vessel entry, blinding, lockout, special permits, etc. This item will be referred to the PT Safety Committee.

● Ground Fault Interrupters

John Andrews expressed concern over contractor equipment used for 110 volt service while inside vessels. Even though ground fault interrupters are used, there are enough different receptacles, plugs, and adapters in use to allow inadvertent bypassing of the ground fault interrupt system. This item will be referred to the I&E superintendent for recommendations.

OLD BUSINESS

● Safety Glasses Repair

Minor repair of safety glasses is now available at Safety Supplies. This item is complete.

● Permanent Ladder Inspection

Inspection of ladders and stairways attached to vessels is intended to be part of the AVIP program. Paul Bailey will issue a memo to MMTS inspectors emphasizing this. This item is complete.

● Elastic Safety Glasses Retainer Straps

These items are now available at Safety Supplies. This item is complete.

December 1, 1980

- Additional Eye Protection

Clip-on side-shields for safety glasses are now available at Safety Supplies. This item is complete.

- Rubble Blocking Substation 412-8

This problem was reported to Leonard Schwab.

- Ice Handling for Field Ice Coolers

The handling problems noticed in October were reported to E. H. Crow. No problems have been reported in November.

- Plant-Wide Roach Problem

The problem of roaches reported in October was discussed with our Purchasing Agent. He was to communicate Monsanto's problem to our exterminator. Meanwhile, roaches seem to be getting worse. Renewed contact with Purchasing will be made.

C. M. Cruse
