least one asbestos body and in my estimation found another one, although it is not one that, as you might say, you can sell downtown.

On my card it is an asbestos body, but it is not good enough that I am definitely going to try to persuade you that it is.

Q There are two lungs in a healthy person. And how much do each lungs weigh and can you give it to me in ounces rather than grams?

A Not without rapid division.

Q Well, how much is it in grams?

A Well, let's say each lung weighs a little more than a pound.

Q Okay.

A That is 16 ounces.

Q How much do these little specs that you circled in green weigh?

A Not more together than a gram which would be 1-450th of a pound.

Q It is the area circled in green that you looked at to try and get some helpful information in
