P.C.V. VALVE LIFE EXTENDER-660

- ★ BETTER MILEAGE
- ★ CLEANER AIR
- ★ SMOOTHER RUNNING
- ★ CLEANER OIL
- ★ STOPS SLUDGE BUILD-UP

Since 1963 automobile and truck manufacturers have for general use installed positive crankcase ventilation systems called PCV. The most popular system is a small valve through which fumes from the crankcase are metered. This valve contains moving parts which MUST be serviced. Car and truck manufacturers recommend cleaning from 4000 to 6000 miles of service. With BALKAMP'S PCV valve life extender you can go one year or 25,000 miles, whichever is first, before cleaning. Carbon, varnish and sludge deposits are trapped allowing clean oil to return to the engine. This means more miles per gallon of gas plus extra miles from a quart of oil. Simple installation requires only a few minutes, using ordinary shop tools.

APPLICATION CHART

Car	Years	Models	Part No.
BUICK	67-68	Riviera	**3-3702**
	64-66	All	**3-3701**
CADILLAC	67-68	All	**3-3703**
	63-66	All	**3-3702**
