INTEROFFICE / LAKE CHARLES

TO J. M. Davis

DATE

August 11, 1972

FROM Mark Wood

SUBJECT

Ammonia Level in
Reproduction

As you have requested, the ammonia in air level has been checked in the Reproduction room. A personnel monitor was set up for four hours in the center of the room and 4 ppm ammonia was detected. As you know, this is well below the established and proposed T.L.V.s.

If you think any additional testing is necessary, please let me know.

MW:rw

A handwritten signature in cursive script that reads 'Mark Wood'. The signature is written in dark ink and is positioned to the right of the typed name 'Mark Wood'.
