Washington, DC 20036

Dear Sandy:

As we discussed, enclosed is the draft of our application package for your review prior to agency submittal.

Attached to this letter are two documents that could be submitted as additional toxicity data to support the data exemption request or give the agency more general data on human toxicity potential. Since this product is a blend of alkyl-benzene homologs the table 1-D attached might be helpful. Please ask Chuck to review these documents and advise as to their potential usefulness in the application.

Sincerely,

Thomas G. Grumbles, C.I.H.
Environmental Quality Manager

SUBJ: PLANT HAZARD COMMUNICATION PROGRAM

VISTA

I just reviewed the plant program as contained in the "big blue book". Randy should be congratulated on a job well done. In particular the section on how to read and understand MSDS's is an excellent and original presentation idea. I don't believe any other plant has done it in such detail.
