Pepperl+Fuchs

Partners in Thinking Ahead

“Your automation, our passion” has been our company mission for over 75 years in the development, manufacture, and support of products and solutions which meet the continuous global requirements of the automation markets which we serve.

Throughout our history, the family ownership of Pepperl+Fuchs reveals not only a strong focus on innovation but also a fundamental corporate mindset. These have been the most important pillars of our success story since the very beginning: working in partnership with you, our customers.

Since the invention of the proximity switch in 1954, there have been numerous milestones and significant achievements that will continue into the present and beyond. In both our key expertise areas of industrial sensor technology or electrical explosion protection, the individual needs and challenges of each customer are always at the forefront of our thoughts and actions.

This applies in particular to Industry 4.0 with its digital transformation, which enables companies to make better use of technology and expertise than ever before. Our commitment to innovation will enhance processes and create IIoT-capable applications, particularly in tandem with proven technology innovations such as Ethernet-APL, which brings increased intelligence to process automation.

Always thinking one step ahead, always realizing visions for the industry and shaping the development of automation in the future, this is what drives us.

Welcome to our world—we are ready for your next challenge!
