Dear Mr. Carlson:

Thank you for your letter of October 28, which has been read with interest.

We were glad to have your comments and, as to the point you raise, Dr. Irving Selikoff was recently given a national award from the American Cancer Society for "pioneering exploration of the relationship between the environment and cancer and cancer in humans, for developing new approaches to check potential carcinogens and for continuously advocating the need to safeguard the lives of workers."

We were, nevertheless, glad to have your views.

Sincerely yours,

John H. Adams
