PLAINTIFF'S EXHIBIT GP-261

to Mr. I. F. Weibel location Akron, N. Y.

from L. K. Ryder location Stamford, Ct.

subject Annual Examinations - Asbestos Workers
29 CFR, Section 1910.93 (j) (3)

date February 15, 1977

Thank you for your memorandum of February 9th outlining the actions taken in response to my report of the December 30, 1976 inspection of the Akron plant.

It is noted that chest x-rays and pulmonary function tests are to be completed by March 1, 1977. As you know, we have xerox copies of previous evaluation reports submitted by Dr. Amdur. It would be appreciated if you will submit xerox copies of Dr. Amdur's evaluation reports of the most recent examinations as soon as possible after you receive them. It will give me the opportunity to review the reports for possible problem cases and bring our Stamford file up to date.

In addition, please let me suggest that you establish a target date for the next x-ray and pulmonary function tests so that we may be in compliance with OSHA requirements for annual examinations.

Many thanks for your interest and cooperation. Please do not hesitate to call if I can lend assistance to your programs.

L. K. R.
