February 25, 1975

Gentlemen:

The "Federal Hazardous Substances Labeling Act" covers the precautionary labeling of packages of hazardous substances intended or suitable for household use. The Sun Oil Company believes the use of similar precautionary labels on containers of certain products used by industry to be equally important.

Our precautionary labeling procedures are continually reviewed in order to insure that our customers are properly informed as to the hazards of handling our products.

You currently purchase bulk shipments of Benzene Nitration. This letter is to inform you that we use precautionary labeling on drum quantities of this product. Since you are ordering bulk shipments, we are attaching a copy of the label pertaining to the precautionary instructions. However, we do not warrant that this is the appropriate label for your end use.

Very truly yours,

F. H. Ellers
Supervisor
