IS SELF-CLEANING

KEEPS WHITE HOUSES WHITE FOR YEARS

Du Pont House Paint starts white—stays white. It's made with titanium dioxide, the pigment that's whiter than snow! It stays white because—

—It's self-cleaning! Du Pont House Paint is so formulated that, as time goes by, a microscopically fine white powder forms on the surface. Heavy rains wash this powder away, taking dust and dirt with it, and leaving the surface clean and white again. Excessive accumulations of dirt (particularly in sooty industrial communities or in heavily shaded locations) and stains from copper screens may delay or interfere with this process. Because this "self-cleaning" is gradual, the wearing qualities of the paint film are not abnormally affected.

As durable as it is beautiful, Du Pont Self-Cleaning House Paint protects against rust, rot, and decay—gives lasting beauty and protection. Yet it costs no more than other good paints. Call in a reliable painter. He'll be glad to use Du Pont House Paint.

IMPORTANT: Our stock of DuPont Self-Cleaning House Paint is limited. Paint is an essential war material. Don't waste it. Don't paint unless your home is vitally in need of protection.
