Interoffice Communication

To VCM Plant Employees
From J. A. DeBernardi
Date January 20, 1981
Subject VCM Medical Testing

The second part of the VCM Medical Surveillance program for employees with ten years or longer in VCM and/or PVC manufacturing will be conducted by Dr. W. W. Massad, on January 27 and 28, 1981. Dr. Massad is a member of the Conoco medical staff and was the doctor who conducted our last hands-on physical session. Employees will receive a physical examination by Dr. Massad and will be given the results of the November tests conducted by Health Examintetics, Inc.

Examinations are scheduled for January 27 and 28. They will take place in the office trailer located just south of the main office building and west of the engineering wing.

Any employee who has a problem with their scheduled date and/or time should have their supervisor contact Jim Brunson as soon as possible. Plant employees reporting for their examination outside of normal working hours will be compensated for this time as overtime pay. Arrangements to receive the physical examination will be made for any eligible employee who will not be available for the above scheduled dates. However, employees are urged to take the physicals at the plant in order to cut down on the inconvenience to them related to doctor office visits.

Please be prompt for your appointment so that unnecessary delays will be avoided.
