Dr. Robert Kehoe
Kettering Laboratories
College of Medicine
Eden Avenue
Cincinnati, Ohio

Dear Dr. Kehoe:-

I cannot adequately express my appreciation of your very interesting letter with it's wealth of information on the subject of lead poisoning and particularly concerning the problem of tetra-ethyl lead in gasoline. This confirms much of my study of the matter and affords specific facts that I know will be extremely useful in the cases that is now coming up and in future ones of like nature. As you so clearly stated my interest is not in winning the case, and I want every claimant under the Workmen's Compensation Act to receive whatever is properly due him under the laws, but I do believe that if there is no merit in such a claim that every effort should be made to prevent the accumulation of erroneous decisions that might tend to establish ~~the~~ the toxicity of lead in gasoline, if as a matter of fact such a thing does not exist.

Again let me thank you most sincerely.

Very truly yours,

William A. Bishop, M.D.
