DOCUMENT DESCRIPTION: Letter to Manfred Bowditch from Vandiver Brown RE Dr. Lanza Stating Asbestosis Report Would be Forthcoming

December 2, 1946

Mr. Manfred Bowditch
Field Director
The Saranac Laboratory
Saranac Lake, N. Y.

Dear Mr. Bowditch:

Allow me to thank you for your two letters of November 27, one relating to the experiments with Myflo Super-cel and the other to the report on the experiments with asbestos dust.

Dr. Lanza did talk to me concerning the report on asbestosis and assured me that you were planning to take steps to see that a report would be forthcoming which would be as complete as possible under the circumstances.

I was very glad to learn that Dr. Lanza had been elected to your Board of Trustees. I think that both Dr. Lanza and the Trudeau Foundation are to be congratulated.

Sincerely yours,

Vandiver Brown
Secretary
