Ms. Susan Milet
E. I. duPont deNemours and Co.
1007 Market Street
Wilmington, DE 19898

Dear Susan:

Enclosed is a copy of Conoco Chemicals' products sold in California. The "Nalkylenes" are linear alkylbenzenes, the "Alfols" are synthetic alcohols, the "Alfonics" are ethoxylated alcohols.

In checking this list versus the California list, there are no hazardous products as defined by the act sold in California. If it is not too late, I would recommend no submittal of Conoco Chemicals products be made with Dupont's submittal.

Sincerely,

Thomas G. Grumbles, Director
Industrial Hygiene
