SUBJ: CMA PRESS RELEASE: AIR TOXICS POLICY

The CMA Board of Directors recently approved a major policy concerning air toxics control. Tomorrow, March 13, CMA will have a press conference, in New Orleans, to announce the details of the policy. The policy is attached for your review.

CMA has made it clear that these are recommended guidelines, and all portions may not be applicable or needed at specific plant sites.

Response to the press release is hard to determine, but we felt you should be aware of the content of the policy.
