MANUFACTURING CHEMISTS ASSOCIATION

1825 CONNECTICUT AVENUE N.W. WASHINGTON D C 20009 (202) 483-6126

C. CLARK
PRESIDENT
GENERAL DIRECTOR

August 3, 1973

John W. Goode, Ph.D., Manager
Catur Research Laboratories
Industrial Bio-Test Laboratories, Inc.
100 East Pershing Road
Catur, Illinois 62526

Dear Dr. Goode:

Thank you for the courtesies extended to Mr. Harry Slatin
the representatives of our member companies, Dr. T. R.
Kelson, Dr. Z. G. Bell, Dr. W. D. Harris, and Mr. H. L.
metz in their visit to your laboratories August 2, 1973.

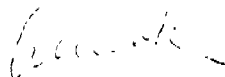

We were all sorry to hear, as you told them and your
letter of August 2, 1973, indicates, that the current start on
vinyl chloride inhalation project, IBT-663-03222, is such
that you recommend a restart of the study on September 1, 1973.
We understand from discussions at the time of the visit that
the total cost of this study to MCA will remain as originally
estimated.

MCA and its member representatives concur with you that a
restart of the study is desirable and advise you to proceed.

It is appreciated that the changes you have made in your
physical setup, as well as those you contemplate will help the
study appreciably.

If there are any other problems, please advise us.

Sincerely,

SL 097144
