Subject PUBLIC HEARING - CALIFORNIA OCCUPATIONAL SAFETY AND HEALTH STANDARDS BOARD
YOUR LETTER OF 9/25/78

I have discussed with Harry Rhodes the testimony to be given at the Standards Board hearing on November 8. Harry informs me he will be testifying on the behalf of Union Carbide; the AIA will not be mentioned during his testimony. Harry presently is preparing his presentation and plans to submit it to us and others for comment.

Harry does not believe it necessary for J-M to comment; however, he would appreciate our written support of his submitted testimony and perhaps the presence of a J-M representative during the hearing.

Harry does not propose to respond to the first two questions in the hearing notice. That problem is being left to Riverside Cement. His testimony will cover points 3, 4 and 5. He will not comment on question 6. On question 3 Harry will recommend levels of 1 f/cc as an 8 hour time-weighted average and 10 f/cc as a ceiling concentration. These values, of course, are the action level limits presently specified by California.
