REPORTED LEAD POISONING CASE

February 11, 1943

Acknowledging receipt of a copy of memorandum written you on February 10, 1943 by Mr. M. A. Taylor regarding the above captioned matter, I see no objection, subject to Dr. Kehoe's approval, to Mr. Taylor quoting in writing to Mr. John L. Fitzpatrick from pages 1, 2 and 3 of Section XIII of our Safety Manual, provided he does not refer to the Safety Manual as the source of the information, as we would not want to have the entire Manual subpoenaed by the Compensation Commissioner or any other outside party.

I therefore suggest that Mr. Taylor, in writing Mr. Fitzpatrick, introduce the quotations as follows:-

"Extracts from statement on 'Potential Hazards In The Distribution And Use Of Leaded Gasoline' approved by the Medical Department of Ethyl Corporation.
