When Installing Brake Shoes:

Reduce the chance of brake failure and save on repair cost by servicing the complete brake system.

Brake Parts:	Service Required:
Brake Shoes	ALWAYS REPLACE Worn-out shoes score drum, cause rattle and to unreliable stopping.
Brake Drums	REPLACE OR RESURFACE Worn drums cause pulling, pulsating brake pedal.
Brake Hardware	ALWAYS REPLACE Worn parts cause premature brake shoe wear, dragging shoes, resulting in lower gear.
Wheel Cylinders	REPLACE OR REBUILD Leaky cylinders cause brake grab and brake system failure.
Hoses And Steel Lines	INSPECT; REPLACE WHEN DAMAGED Leaks, cracks, kinks or blockage can cause brake system failure.
Brake Fluid	INSPECT Fluid in master cylinder should be checked and recommended by vehicle manufacturer. Pressure in brake system.

CAUTION: Always service/replace all parts in axle sets for safety reasons.

PRECAUCION: Por razones de seguridad, siempre de servicio o reemplaza todas las piezas de los ejes.
ATTENTION: Toujours réparer/remplacer toutes les pièces des ensembles d'essieux.
