Mr. B. H. Gambrill, President
China Gulf Plastics Corporation
P. O. Box 22144
Taipei, Taiwan 105
Republic of China

Dear Bryan:

Further to my letter to you on September 9, I now understand that pre-arrangement can be made with the Inspector General of the Chinese Customs (台北市新生南路一段八十五号, 财政部海关) with regard to temporary importation of professional tools of trade so that my industrial hygiene survey instruments can be cleared through the Customs without several days of delay.

During our stay in Taiwan, Dr. Gibson wishes to review medical surveillance data on VCM workers, solvent workers, mercury workers, etc. I wish to concentrate my effort in surveying Toufen factory for VCM, Solvents (benzene in particular), dusts of lead, cadmium, barium and dyes, and mercury vapors. I would like to review with Ed Lu the progress of CGPC's industrial hygiene monitoring program, and engineering control measures. If possible, I would also like to have a chance to talk to Mr. Bill Bonnell about industrial hygiene matters related to Asia Polymer Corporation's Polyethylene Plant.

Kindly advise if I need to make further preparation or if Mr. Ed Lu has any special requests.

Sincerely,

R. T. Cheng
