Mrs. B. Colbourn
Assistant Personnel Manager
Garlocks Canada
66 Jutland Street
Toronto, Ontario

Dear Mrs. Colbourn:

Enclosed is a copy of our Data Sheet #18 on Asbestos. The Threshold Limit Value for Asbestos fibre recommended at the present time is two fibres per millilitre that are greater than five microns in length. This value is tentative and is under review. As mentioned in our telephone conversation, the data sheet is also under review.

Yours truly,

W. L. Tidey, M.D.
Acting Director
Occupational Health Protection Branch.
