

912 Broadway
Bayonne
N.J.

Sept. 8. 1954.

Doctor, Robert A. Kehoe, M.D.
The Kettering Laboratory,
Eden Avenue,
Cincinnati,
Ohio.

Dear Doctor;

Inclosed is a letter. It explains itself, only that the name, Arthur Brown is fictitious. It is the name I gave when I was xrayed by the Dept of Health when they sent their Xray wagon to Bayonne N.J.

Please don't think I have hallucinations. I was once in Dr Largay's office for treatment when I saw him examining hundreds of these small pictures, taken just a week or so before in Bayonne by the same wagon.

If any hallucination is fixed I believe it has been in Doc's mind for every time I tried to tell him that something was wrong he laughed until three years ago when he detected my heart going bad. " He said "You are not kidding me this time."

I felt it he came across the same old Obliterated angle and the name Hancock he would pass it by.

Hence the change in name to Arthur Brown a neighbor who lives above me and who promised to see I got the Xray results which you see here.

Will you send for the picture? I did not give any doctors name so it should be on file at the Trento Office.

Thank you.

Charles W. Hancock

Charles W. Hancock.

P.S. I hope you did not receive a shock when you got my bundle of photo stats. I have many full size Xrays here in my home that I can send to you.

C.W.H.
