- Why do we not set goals at 0?
- Why are we using an outside vendor to update safety manual?
- Is coal part of company statistics?
- Why are 9 months on asbestos medical monitoring program and no one who we know had exposure prior to new asbestos standard?
- I heard there is a contractor from Victoria Plant dying from PH exposure. Is that true?
- Can you tell me the difference between a fire and a potential fire?
- ~~What~~ What are results from area monitoring? Bruce Reed.
- Health concerns on RCF?
- Did we do any monitoring for H₂S?

John Vaugher -

Soft Kickoff Meeting

1. ~~Chart~~ comments + questions + suggestions
that need follow up.
2. Let people know we will
follow up + respond.
3. Set process in motion - let
to appropriate people to accomplish
follow up.
4. Ask people in 3 above to let you
know when they have completed
follow up.
5. Don't accept responsibility of follow up
by yourself also ask questions.

Let's consider for a moment that you don't have a job, like before you got the job you have now. How many of you are glad you have a job

* Well how glad would you be if I told you that you ~~had~~ ^{possibly} would be seriously hurt, or ~~be~~ disabled every 3 years.

What if I said this job requires you to be exposed to cancer causing chemicals or chemicals that could kill you instantly.

How happy would you be?

Safety is what protect YOU !

96% of all injuries are caused by unsafe acts.
