Re: Removal & Replacement of Asbestos
Insulation Survey
DuPont - Chattanooga Plant

Gentlemen:

In accordance with your request, we accompanied you on a one day survey of your Chattanooga Plant in an effort to arrive at an estimated cost for replacement of asbestos containing insulation materials. Based on the information we could gather in that one day survey, the following is our best "educated guess", estimate of what the present day cost of this removal and replacement would be.

LABOR & TOOLS	$31,200,000.00
MATERIAL, FREIGHT & TAX	22,800,000.00
TOTAL	$54,000,000.00

As we discussed with you, this estimate would include the cost of removal and disposal with the disposal being at the plant site. Transporting to an off site dump was not included in the estimated figure. Also, as we suggested to you, we did not include the cost of monitoring the asbestos fiber removal. We recommended that this be done by an independent laboratory.
