

April 5, 1961

Mr. E. A. Dennison
Johns-Manville Corp.
Gypsum Products Division
22 East 40th Street
New York, N. Y.

Dear Mr. Dennison:

This is to certify that the 4 foot wide square edge gypsum sheathing, manufactured by Bestwall Gypsum Company for the Johns-Manville Corp., is made by the same formula and to the same specifications as that which is made in our plants for sale under our own label.

The performance of the sheathing is covered by a report of the Pittsburgh Testing Laboratory, dated Dec. 28, 1959 under title: Witnessing Tests of Sheathing Material for Resistance to Racking Under Dry & Wet Conditions on 48" Wide, Square Edge, One-half Inch Thick, Bestwall Gypsum Sheathing.

Very truly yours,

BESTWALL GYPSUM COMPANY

C. G. Shuttleworth
