L. [illegible]

In advance [illegible] recent [illegible] work on Aroclor quality improvement, a patent and literature search was made. While the object of this search was to screen the patent situation regarding [illegible] and removal treatment, a number of interesting references in other areas were found. The pertinent published abstracts are [illegible].

The search covered Chemical Abstracts from 1927-[illegible], previously through collective [illegible] Decennial Listing of References will be found in notebook ref. [illegible].
