Subject: PROPOSED COUNTER DRAFT FOR
"ROOF SYSTEM" CERTIFICATION

**PLAINTIFF'S
EXHIBIT**

JM 1016

Attached is our proposed counter draft for "Roof System" Certification. Essentially it offers certification for:

- A) The fact that the requesting roofing contractor is in fact a J-M approved roofer
- B) If the insulation and membrane are J-M products they themselves, as the J-M BUR insulation system, are compatible
- C) The cited J-M (spec) number are currently in the J-M publications as J-M BUR Systems
- D) J-M is not an Architectural, Engineering or deck firm and will not be responsible for those disciplines or products

We are very interested in securing this business with the Air Force and are willing to listen to other counter proposals. To certify beyond the scope of what I have listed would require some of the following:

- A) Review of plans and specs for the particular project
- B) Job site inspection
- C) Deck inspection by District Engineer or Sales Rep
- D) Engineering and/or architectural calculations
- E) Inspection and application of BUR system as put down

At best we only do some of these services for J-M when we issue a J-M roof guarantee, other services such as A & D we are not really capable of doing on a national basis.

Let me have your comments.

BUILT UP ROOF MANUFACTURERS CERTIFICATION

The following statement is required from Johns-Manville the built up roof manufacturer:

- A. This is to advise you that Woodland Roofing Company 3031 Cass Road, Traverse City, MI 49684, is accredited as an authorized and approved applicator of our roofing system.

We have reviewed this approved roofer's request for manufacturers certification of the roof/insulation system. We certify that the following described system is listed in our BUR manual and their elements are intended to be compatable as a BUR system.

<u>Building Number</u>	<u>Roofing System Designation</u>	
	<u>Membrane</u>	<u>Insulation</u>
_____	J-M 4AIS	J-M #504
_____		1 layer 2-3/4 Fesco Foam
_____		1 layer 3/4 Fesco Foam

Johns-Manville is not a manufacturer of structural roof decks nor does it practice AIA or engineering evaluation for the acceptability or compatability of the structural roof deck with the listed J-M "Roofing System Designation".
