

INTRACOMPANY CORRESPONDENCE

3-98 (Rev. 1-68)

FROM:	Homer M. Cole - Industrial Hygiene, GOB
TO:	PLANT SAFETY AND INDUSTRIAL HYGIENE REPRESENTATIVES
COPY:	B. J. Sasser - Corporate Safety, Koger; Dr. E. C. Irby - Medical, EXO
DATE & SUBJECT:	RESPIRATORY PROTECTION 1981 June 24 DURING ASBESTOS DEMOLITION AND/OR REMOVAL

As a result of several recent studies, it has come to our attention that elevated levels of airborne asbestos fibers can occur during the demolition and/or removal of asbestos. Consequently, it is the recommendation of this department that high efficiency half-mask and dual cartridge respirators be considered minimal acceptable respiratory protection for this procedure.

If you have any questions, please advise.
