TO:

SUBJECT: X-RAY

9-9-87 CHEST (PA): The cardiomedastinal silhouette is border-line in width. There is no evidence of pleural fluid or pneumothorax. An artifact overlies the right pulmonary apex. Otherwise the chest appears clear. No significant interval change is apparent comparing previous films dating back to 8-20-80.

Conclusion: Heart size upper normal.  
Otherwise negative chest allowing for an artifact  
overlying the right pulmonary apex.
